

Dear Colleague,

4 to 6 % of diabetes cases develop diabetic foot. For these patients an early diagnosis and prompt systematic treatment would help prevent foot amputations.

At Kokilaben Dhirubhai Ambani Hospital (KDAH), a comprehensive Diabetic Foot Clinic is established to provide a complete diagnosis, treatment, foot care management and rehabilitation program.

We request your presence for the first CME on diabetic foot, to be held on 6th Feb 2011. The CME program would highlight from Basics to most Advanced Management of Diabetic Foot.

Thanking You,

Yours sincerely

Dr Ram Narain, Chief Operating Officer - KDAH

Diabetic Foot Clinic :

Dr. Dheeraj Kapoor – Endocrinologist

Dr. Joe George – Endocrinologist

Dr. Vimal Someshwar – Interventional Radiologist

Dr. Shekhar Raghuram – Vascular Surgeon

Dr. Abhishek Shrivastava – Physical Medicine and Rehab.
